

Integrated Quality, Environmental Protection and Major Accident Prevention Policy

Our company specializes in the development, production and supply of stainless steel container systems and KEG barrels that meet high requirements for quality, safety and reliability. Our goal is to be one of the respected manufacturers and partners in the field of stainless steel packaging solutions for a long time.

We are committed to responsible business that emphasizes product quality, employee health and safety, environmental protection and risk prevention. These principles are an integral part of our corporate culture and day-to-day management of the company.

The basic principles of our policy:

Compliance with legislation and requirements

We comply with all applicable legal regulations, technical standards and other mandatory requirements relating to our products, processes, occupational safety, environmental protection and the prevention of major accidents.

Customer orientation

We strive to meet customer requirements and expectations through quality products, reliable deliveries and professional communication.

Health and safety

We consider the health and safety of employees, co-workers and visitors to be one of our highest priorities. We ensure safe working conditions, systematically identify and evaluate risks and take measures to minimize them. We support the prevention of accidents at work, occupational diseases and emergency situations and lead employees to responsible and safe behavior.

Continuous improvement

We regularly evaluate the performance of our processes and take measures to improve quality, safety and environmental performance based on objective data and analyses.

Risk prevention and management

We identify and evaluate risks in the field of quality, occupational safety, environmental protection and OHS and take preventive and corrective measures to minimize them.

Employee development

We support the professional development, training and improvement of employee competencies as a key prerequisite for the sustainable development of the company.

Responsible Stakeholder Relations

We build long-term and transparent relationships with customers, suppliers, government bodies and local communities.

Sustainability and responsibility

We strive for efficient use of resources, minimization of waste and negative impacts on the environment, and act in accordance with the principles of sustainable development.

The company's management is committed to creating the conditions and providing the resources necessary to fulfil this integrated policy and to continuously improve the management system.
